EXAMINER'S ACTION

Art Unit: 1107

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, claims 1-8, drawn to a process, classified in class 437, subclass 183.

Group II, claims 9 and 10, drawn to an apparatus, classified in class 29, subclass 25.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (M.P.E.P. § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process such as a non-semiconductor chip fabrication process.

A telephone call was made to William F. Westerman on 13 September 1995 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
